BACHELOR IN CIVIL ENGINEERING (BSc)

Name of faculty: Faculty of Architecture, Civil Engineering and Transport Sciences
Type and name of qualification: Civil engineer (BSc)
Duration of studies: 8 semesters - full time programme
Intake: September

Programme introduction:

The programme provides students with multidisciplinary skills to produce professionals able to work in diverse areas of the broad field of Civil Engineering. Potential occupations include engineering design, construction management, employment at a government regulatory agency, specialized field and laboratory testing and analysis, operation and maintenance of civil engineering works, site planning and development as well as contract oversight. Civil engineering professionals work with architects, engineers from other disciplines, contractors, government officials, business people, and finance/insurance specialists. The bachelor’s program also prepares students to pursue studies for a master's degree.

Specialization: Transportation infrastructure / Structural engineering

Structure of studies

The total number of credits needed to complete the programme is 240. The programme is divided into five categories: natural sciences (51 credits), economics and human sciences (17 credits), fundamental technical knowledge (117 credits), specialized technical knowledge (40 credits), thesis course (15 credits). 1 credit equals one ECTS credit, and 1 credit is defined as 25 student working ours.
